HORIZON N20

Rota-DIN[®] PP

Removable & rotatable DIN rail for easy access to components.

Unique UV Label

Peel and fade resistant.

New Gravity Catch[®]

Positive closing position. Handle remains flush with door.

Dedicated DIN section

Removes the need for panel mounting of circuit equipment.

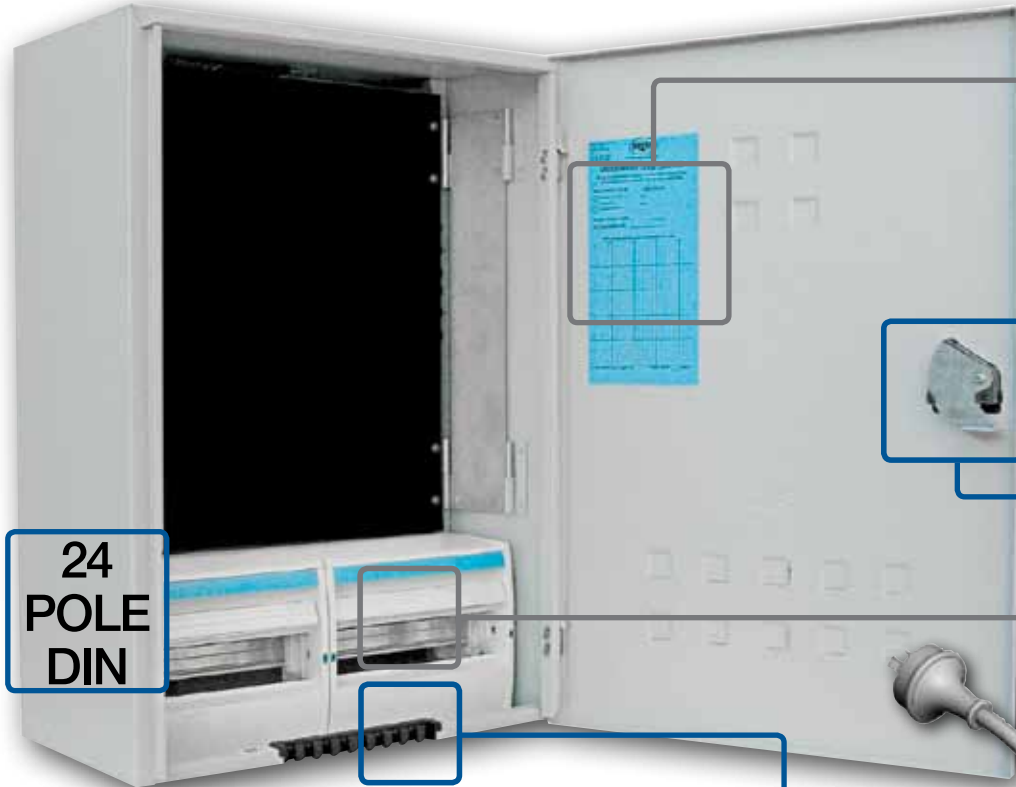

Safety Cord Retainer^{PP}

Stronger. Safer. Smarter.

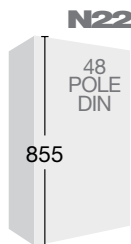

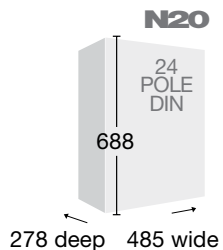

Why HORIZON is the safest choice!

- ✓ **Bevelled door and double folded edges** resist twisting and make for safer handling. Edges are 'soft' and therefore will not cut cables or people.
- ✓ **Rota-DIN[®] Rotatable DIN rail^{PP}** allows much greater visibility to terminal connection points of the switchgear allowing safer termination of cables and better inspection capabilities.
- ✓ **Insulated Escutcheons[®]** New moulded plastic escutcheon with captive 1/4 turn screws preventing any possibility of accidental shorting or shock.
- ✓ **Panel retainer** is now captive (stays with the panel) preventing nuts from falling off and being lost.
- ✓ **Covered labelling section** prevents labels peeling and falling off.
- ✓ **N/E links** are individually and uniquely numbered with increased visibility of numbers above and below link.
