# Jyka System **2** series Panelboards

The success is in the system

Jyka 250 **2** series Panelboards represents a significant advancement in the range of commercial / industrial distribution systems offered by hager. Combining the highest manufacturing and design standards together with industry traditions, the Jyka 250 **2** series range provides versatility and flexibility incorporated into a modular panelboard system.

## The Range

The range comprises of eight primary Panelboards from 18 to 72 poles, nine versatile kits that accommodate incoming and outgoing devices and a matching extension box.

Construction from 1.6mm steel with a powder coated finish, also ensures a robust enclosure, which adequately protects internal devices from any harm.

As is the case with all hager products, ease of installation is one of our highest priorities. This is illustrated by the substantial wiring space provided within our Jyka 250 **2** series Panelboards. They incorporate a removable chassis and equipment pan section, which when removed, provide excellent cabling access and reduce the chances of swarf contaminating the enclosed switchgear.

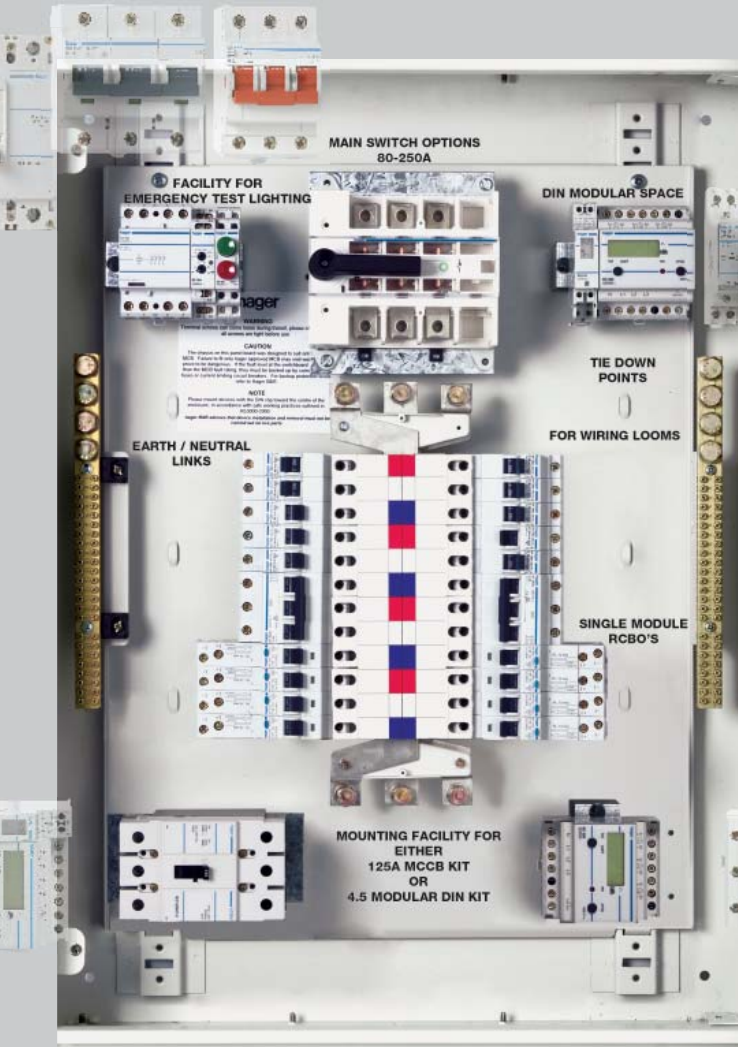

## Functionality

Contractor feedback and recommendations were an integral part of the engineering and design process for the Jyka 250 .

Some base line parameters for the Jyka 250  includes,

- Heavy-duty hinge pins on doors
- Separate hinged escutcheon
- IP42 ingress protection
- Removable top & bottom enclosure ends
- 250A chassis
- 1.6mm Steel Construction as standard
- Earth & Neutral links c/- twin screws and four main bolt connections
- Convenient tie down points for wiring looms

## Versatility

Demands placed upon electrical installations are ever-increasing and as a result, Electrical Consultants are requesting long-term installation adaptability and performance.

The Jyka 250  is a system that provides both short and long term product flexibility. Tailoring your panelboard has never been easier, with choices and options to suit most applications. Whether choosing between the extensive range of main switch kits, chassis sizes or simply meeting the need for additional DIN space, our Jyka 250  can be customised off the shelf, without the inconvenience of waiting for your requirements to be specially manufactured.

We have also incorporated user-friendly features such as, left or right hinged doors with a choice of locks, multiple extension box configurations and our unique chassis and equipment pan section, which upon removal allows for maximum cabling entry and ease.

## The test of time

Whether your requirements are for the latest in European circuit protection or for a quality Australian designed and built panelboard, hager provide the solution.

With over 45 years experience in designing and manufacturing electrical devices and enclosures, hager have developed the experience and understanding to exceed our customer's expectations.

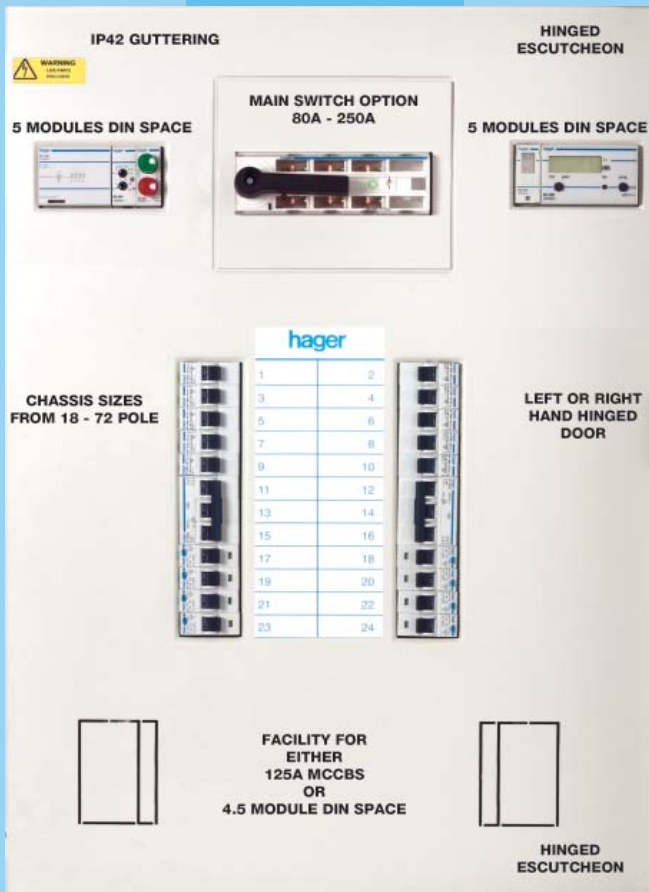

When you purchase your next Jyka 250  panelboard you can rest assured that you are purchasing your panelboard from an original manufacturer, which will also stand the test of time.

Discover our full range of Jyka System Panelboards by contacting your closest sales office.

The success is in the system.
