

No matter where you are B&R has the solution...

- 1 NSW Enclosure with plain black laminated panel c/w 11 pole plastic sub-board.
- 2 NSW Enclosure with pre-drilled black laminated panel to suit bottom connect meters. C/w 11 pole plastic sub-board.
- 3 NSW Enclosure with pre-drilled black laminated panel to suit Integral Energy requirements. C/w 11 pole plastic sub-board.
- 4 NSW Enclosure with pre-drilled black laminated panel to suit Energy Australia requirements. C/w 11 pole plastic sub-board.

B&R has always delivered innovative products in NSW that meet the changing requirements of industry.

Due to metering equipment changes B&R are proud to introduce two new enclosures with pre-drilled panels that conform to the metering layout requirements of Energy Australia and Integral Energy.

With the addition of these two new products to our range, B&R provides an off the shelf solution no matter where you are in NSW. So save time and money by specifying B&R when you buy your next metering enclosure.

For more information on our comprehensive range of B&R metering solutions please contact your local hager B&R representative.
