

RotoLoc  **data**
 'the jack that won't push back'

hagerblu's award winning **RotoLoc**  fitment system has produced another innovative first with; 'the jack that won't push back'.

The award winning **RotoLoc**  fitment system eliminates any push back of the mechanism when plugging in patch or telephone leads.

Clutter-free functionality

Our unique multigang power & data solutions provide clutter-free functionality, within a modern, contemporary design.

Clear & simple circuit identification

The use of our **RotoLoc**  ID windows provide clear and simple circuit identification.

Australia's Best Bakelite

RotoLoc

Data mechanisms are part of the **hagerblu** family. This family of innovative products was awarded with a 2006 Australian Design Award.

RotoLoc fitment system

Our unique **RotoLoc**  fitment system makes the insertion and removal of data mechanisms a breeze. This helps to eliminate any damage to data mechanisms and grid plates, whilst providing a secure data installation system.

Termination made simple

Terminating our new data mechanism is simple. They feature clear termination labelling with standard insulation displacement connection.
