

# **B&R** LEADING THE WAY IN TASMANIA

## READY TO GO!!

B&R are proud to introduce our new series of metering enclosures which have been designed to meet the installation requirements of Tasmanian contractors. Everything is in the BR130V163TAS, ready to install straight out of the carton. It even has a hanging bracket on the back for use as a temporary supply in a permanent position.

Our new Meter Enclosure satisfies the Aurora SIR's requirements and meets the AS/NZ3012 requirements for use as a temporary supply in a permanent position.

For more info on our new TAS Series of metering enclosures please contact us to speak to a sales representative.

Designed by Tasmanians for Tasmanians...

# Features & Benefits

U/GBP

## Features

Increased DIN Poles without increasing closure size

Easy cable access of DIN section from top to bottom

Wired Panel

AS/NZS3012 compliant

NATA tested to IP23

Suits U/GBP Bracket

## Benefits

Offers the contractor a choice to suit their installation needs

By repositioning the DIN section to the side of the enclosure, cable entry is now simplified and accessible from the top, bottom or rear of the enclosure

Aurora panel approval No. 6979

Meets the requirements for use as temporary supply in a permanent position

Required by SIR's and has been independently tested

Easy installation for temporary supply in a permanent position
